

WHO WE ARE

Sonrisa was founded by independent Hungarian IT professionals ten years ago. We are still what we are: a diverse community of smart and passionate individuals. Our mission is to make a positive impact on the world by delivering real business value to our customers. We are dedicated to the art of software delivery by keeping it lightweight and agile and utilizing the full power of open source and state of the art technologies. We are proud that we consistently deliver scalable and reliable systems. We implement game changing applications for clients all around the Globe reaching millions of users all together.

LOOKING FOR GREAT TALENTS

WHO YOU ARE

As a Software Developer, you'll be working on complex custom-designed business applications that use a wide range of the latest technologies. We're seeking talented and passionate people with a creative approach to problem-solving. You will be working on projects in a team of 5-8.

AS A JAVA DEVELOPER

YOUR EXPERIENCE

- Software development and delivery with Java.
- Basic knowledge of enterprise Java (Spring and/or JEE).
- Basic Knowledge of OR frameworks (e.g. Hibernate, EclipseLink).
- Basic understanding of application servers (e.g. Apache Tomcat, Jetty, Oracle WebLogic).
- Good understanding of devops tools (e.g. Git, Maven, Nexus, Jenkins, Sonar).
- Work done with virtualization and cloud technologies (e.g. VMware, KVM, AWS).
- Basic understanding of OO principles and design patterns.
- Working with database technologies (e.g. RDBMS, graph databases, document databases, time series databases).
- Knowledge of application integration technologies (web services, messaging, EI patterns).
- Understanding the principles of UI ergonomics and UX best practices.
- Implement tasks based on written specification.
- Research bleeding edge technologies.
- Familiarity with multiple programming paradigms and be open to learning new ones.
- Working experience with REST.
- Working with Angular or other JavaScript frameworks.

YOUR CONTRIBUTION TO SONRISA

- ▶ Work in an agile development team to build enterprise and high-scale applications.
- ▶ Understand the importance of refactoring.
- ▶ Work on international projects.
- ▶ Be a useful member in our development teams.
- ▶ Think through hard problems and work with brilliant people to make client ideas a reality.
- ▶ Have a passion for writing clean, object oriented code.

LOCATIONS

Choose the best for you:

- ▶ Budapest site: 1022 Budapest, Bég u. 3-5.
- ▶ Szeged site: 6726 Szeged, Jankovich u. 14.
