s:)nrisa

WHO WE ARE

Sonrisa was founded by independent Hungarian IT professionals ten years ago. We are still what we are: a diverse community of smart and passionate individuals. Our mission is to make a positive impact on the world by delivering real business value to our customers. We are dedicated to the art of software delivery by keeping it lightweight and agile and utilizing the full power of open source and state of the art technologies. We are proud that we consistently deliver scalable and reliable systems. We implement game changing applications for clients all around the Globe reaching millions of users all together.

LOOKING FOR GREAT TALENTS

WHO YOU ARE

As a Senior Software Developer, you'll be instrumental in the design and delivery of mission critical and complex custom-designed, business applications that use a wide range of the latest technologies. We're seeking talented and passionate people with a creative approach to problem-solving. You will be working on projects in a team of 5-8. You will be responsible for the OO design and implementation of large-scale custom-designed distributed systems.

AS A SENIOR JAVA DEVELOPER

YOUR EXPERIENCE

- Software development and delivery with Java.
- Advanced knowledge of enterprise Java (Spring and/or JEE).
- Advanced knowledge of OR frameworks (e.g. Hibernate, EclipseLink).
- Strong understanding of application servers (e.g. Apache Tomcat, Jetty, Oracle WebLogic).
- Good understanding of devops tools (e.g. Git, Maven, Nexus, Jenkins, Sonar).
- Working with containerization and cloud technologies (e.g. VMware, KVM, AWS, Docker).
- Expert understanding of OO principles and design patterns.
- Working with various database technologies (RDBMS, graph databases, document databases, time series databases).
- Knowledge of application integration technologies (web services, messaging, EI patterns).
- Understanding the principles of UI ergonomics and UX best practices.
- Working with Angular or other JavaScript frameworks.
- Working experience with REST.
- Knowledge of Apache Spark is a plus.
- Experience in machine learning is a plus.

YOUR CONTRIBUTION TO SONRISA

- :) Work in an agile development team to build enterprise and high-scale applications.
- :) Become a mentor and role model for less experienced developers.
- :) Employ Agile development including task estimation, test automation, deployment automation and Continuous Integration to improve overall execution speed and product quality.
- :) Understand the importance of code review and refactoring.
- :) Work on international projects.
- :) Be a game changer in our development teams.
- :) Think through hard problems and work with brilliant people to make client ideas a reality.
- :) Have a passion for writing clean, object oriented code.

LOCATIONS

Choose the best for you:

- :) Budapest site: 1022 Budapest, Bég u. 3-5.
- :) Szeged site: 6726 Szeged, Jankovich u. 14.
