s:)nrisa

WHO WE ARE

Sonrisa was founded by independent Hungarian IT professionals ten years ago. We are still what we are: a diverse community of smart and passionate individuals. Our mission is to make a positive impact on the world by delivering real business value to our customers. We are dedicated to the art of software delivery by keeping it lightweight and agile and utilizing the full power of open source and state of the art technologies. We are proud that we consistently deliver scalable and reliable systems. We implement game changing applications for clients all around the Globe reaching millions of users all together.

LOOKING FOR GREAT TALENTS

WHO YOU ARE

As a Software Developer, you'll be working on complex custom-designed business applications that use a wide range of the latest technologies. We're seeking talented and passionate people with a creative approach to problem-solving. You will be working on projects in a team of 5-8.

AS A SENIOR .NET DEVELOPER

YOUR EXPERIENCE

Must have:

- Advanced knowledge of ORM frameworks (e.g. Entity Framework, NHibernate).
- Expert understanding of OO principles and design patterns.
- Working with various database technologies (e.g. RDBMS).
- Understanding of data structures, algorithms, distributed systems, databases, and programming languages.
- Knowledge of application integration technologies (web services, messaging).
- Understanding the principles of UI ergonomics and UX best practices.

Good to have:

- Strong understanding of the Windows server runtime environment (e.g. IIS, AD).
- Good understanding of devops tooling (e.g. Git, NuGet, FxCop, StyleCop, Jenkins, GitLab CI, Sonar, VSTS).

- Knowledge of cloud technologies (e.g. Azure, AWS).
- Working with database technologies (graph databases, document databases, time series databases).
- Knowledge of application integration technologies (EI patterns).

YOUR CONTRIBUTION TO SONRISA

- Work in an agile development team to build enterprise and high-scale applications.
- Become a mentor and role model for less experienced developers.
- Produce tested, clean, maintainable code, participate in code reviews.
- Employ Agile development including task estimation, test automation, deployment automation and Continuous Integration to improve overall execution speed and product quality.
- Understanding the importance of code review and refactoring.
- Have a basic understanding of UI ergonomics and UX best practices.
- Work on international projects.
- Be a game changer in our development teams.
- Think through hard problems and work with brilliant people to make client ideas a reality.

LOCATIONS

Choose the best for you:

- Budapest site: 1022 Budapest, Bég u. 3-5.
- Szeged site: 6726 Szeged, Jankovich u. 14.
